We stand behind our product!

TRASH REEL™

PATENT NO. 7,377,091

The “mini corn reel”
guaranteed to clear fluff and
trash from your cornhead

Designed by farmers who've
“had it” with trash accumulating
on their cornheads.

NEW! Full-length kits
now available!

- The Trash Reel is a revolutionary product designed to clear trashy corn leaves and stalks from your cornhead. Use on dry days when fluff and trash piles up in front of your feederhouse opening.
- You're able to combine at your normal speed. No more reduced speed (or worse, stopping) to allow trash to feed into the machine. More productive.
- **No more stopping to kick, push, and drag trash from the cornhead. Safer.**
- The Trash Reel easily mounts to a John Deere cornhead. Other cornheads available.

- When not needed, simply fold up and combine corn.
- When folded, it clears the cab and snouts... even with the snouts folded.
- **Works well in downed corn, especially with plastic snouts. Call and ask about our experiences!**

- Brackets available for CIH, Geringhoff, New Holland and some Gleaner heads at an additional \$150.

- Wide row kits available for an additional \$300.
